Triunfo Sanitation District

Comprehensive Annual Financial Report
For the Fiscal Year Ended
June 30, 2019 and June 30, 2018

Providing Outstanding Service Since 1963

Board of Directors

Janna Orkney, Chair

Susan Pan, Vice Chair

Leon Shapiro, Director

Raymond Tjulander, Director

James Wall, Director

December 16, 2019

Honorable Board of Directors
Triunfo Water & Sanitation District
Ventura County, California

Members of the Board of Directors:

The Comprehensive Annual Financial Report of the Triunfo Sanitation District (District) as of and for the fiscal years ended June 30, 2019 and June 30, 2018; is hereby submitted. State law requires that every general-purpose local government publish within six months of the close of each fiscal year a complete set of audited financial statements.

Management assumes full responsibility for the completeness and reliability of the information contained in this report, based upon a comprehensive framework of internal control that it has established for this purpose. Because the cost of internal control should not exceed anticipated benefits, the objective is to provide reasonable, rather than absolute, assurance that the financial statements are free of any material misstatements.

Moss, Levy, Hartzheim, LLP, has issued an unmodified (“clean”) opinion on the District’s financial statements for the fiscal years ended June 30, 2019 and June 30, 2018. The independent auditor’s report is located at the front of the financial section of this report.

Management’s discussion and analysis (MD&A) immediately follows the independent auditor’s report and provides a narrative introduction, overview, and analysis of the basic financial statements. MD&A complement this letter of transmittal and should be read in conjunction with it.

PROFILE OF TRIUNFO

A public agency, the Triunfo Sanitation District was organized November 12, 1963, as a special district under the County Sanitation District Act, California Health & Safety Code Section 4700 et seq., to provide sanitation services. The District covers approximately 50 square miles of the southeastern portion of Ventura County adjacent to the Los Angeles County line, and serves a population of approximately 33,000. The District receives no tax revenue and relies on fees and charges for services provided.

On October 12, 1964, the District and Las Virgenes Municipal Water District (LVMWD) entered into a joint powers agreement establishing a Joint Venture to construct, operate, maintain, and provide for a regional sewerage system to serve the area within the two Districts' boundaries. The ancillary production and sale of recycled water as a byproduct of the wastewater treatment process has been welcomed by the District's water customers.

The District expanded its service to the community in 1993 with the purchase of the Metropolitan Water Company located within the District's boundaries in Oak Park. The new venture became known as the Oak Park Water Service (OPWS).

The District's five-member Board of Directors (Board) is comprised of five residents of the District elected at-large by the registered voters of the District.

The District's Board meets on the fourth Monday of each month. Meetings are publicly noticed, and citizens are encouraged to attend and participate.

District staff is provided entirely by contract with Mark Norris for the position of General Manager and the Ventura Regional Sanitation District (VRSD) for all other positions. In fiscal year 2019, this support consists of approximately eighteen (17.72) full-time equivalent positions made up of the part-time efforts of more than forty-seven (47) individuals in ten (10) different areas of expertise.

Administration – The five directly elected Board members at-large are employees of the District. In addition, the District contracts with Mark Norris and VRSD for all of its management, financial, engineering, maintenance, and operations functions. This arrangement, accomplished through a long-term reimbursable contract, allows the District to draw from a pool of sophisticated and technologically capable employees when needed and pay for only the services actually received. On June 4, 2015, a new ten-year contract agreement was entered into between TSD and VRSD. This contract was amended on August 4, 2018 to address various matters pertaining to the TSD General Manager.

Joint Venture – The bulk of the District's sanitation and recycled water activities occur in concert with those of its Joint Venture partner, LVMWD, located in western Los Angeles County. Joint Venture facilities include the Tapia Water Reclamation Facility (Tapia), Rancho Las Virgenes Composting Facility (Rancho), a pumping station and force main that conveys biosolids from Tapia to Rancho, and the portion of the recycled water distribution system which lies within Los Angeles County. A five-year capital improvement plan is in place, and updated at least annually, to maintain these facilities and protect the District's investment in them. Capital improvements are primarily funded through sewer connection fees of \$13,675 per Dwelling Unit.

The District presently owns 29.4% of the Joint Venture wastewater treatment facilities, 44.2% of the land, and 58.4% of the trunk sewers. The District's right to use the facilities is commensurate with its ownership share (29.4%), while recycled water rights are based on actual sewage flows into Tapia. In addition, the District owns 29.4% of the Joint Venture recycled water distribution system.

Tapia Water Reclamation Facility

The Tapia Water Reclamation Facility applies state-of-the-art technology to transform wastewater into high-quality recycled water. It serves residents living across 120 square miles of southeastern Ventura and western Los Angeles Counties. While the current flow to Tapia averages 7.2 million gallons of wastewater per day (mgd), the District flow averages about 2.15 mgd, representing 30% of the total. Tapia is potentially capable of treating up to 16 mgd.

The wastewater treatment process at Tapia duplicates and accelerates natural biological methods of cleaning wastewater. Filtration and disinfection, the third phase in Tapia's tertiary treatment process, ensures the treated water meets stringent water reuse standards, and is environmentally safe for wildlife and vegetation. The beneficial reuse of this high-quality water has been an important Joint Venture focus since 1972, long before it became a common practice.

Tapia has been honored with numerous awards, including:

- American Water Resources Association (AWRA) Sandor C. Csallany Institutional Award for Exemplary Contributions to Water Resources Management (2004)
- Association of California Water Agencies Environmental Achievement Award (1990 and 1995)
- California Water Pollution Control Association Plant of the Year (1989)
- U.S. Environmental Protection Agency national & regional Award of Excellence (1988)
- Los Angeles Area Plant of the Year (6 times)
- National Environmental Awards Council Outstanding Operation, Maintenance and Total Reuse
- Water Reuse Association Certificate for Contributions to Water Reuse in California

A major challenge for the Tapia plant occurred late in fiscal year 1998 in the form of revised National Pollution Discharge Elimination System (NPDES) permit requirements. Despite significant ongoing efforts, the onerous standards of the revised permit have not been significantly reduced. Discharge of recycled water into Malibu Creek is now prohibited from April 15 through November 15 each year. With extensive water recycling, approximately 300 million gallons (900 acre-feet) of water must either be diverted from the creek to approved recycled water uses, or stored for later use. An alternative is to discharge during this period to the Los Angeles River Watershed, known as "005 discharge."

Triunfo Sanitation – The Bell Canyon portion of the District was served for many years by a pump station and force main transporting wastewater up over a hill to Tapia. With the pump station reaching the end of its life and increasing demands expected on Tapia's capacity, a gravity trunk sewer was constructed in 1985. This allowed the transport of Bell Canyon's wastewater to the Tillman Water Reclamation Plant operated by the City of Los Angeles within Los Angeles County.

Bond debt was issued for the sewer line construction by Bell Canyon Sewer Assessment District No. 85-1, formed for this purpose. Principal and interest payments were subsequently funded through property owner assessments, which were then paid in full two years earlier than originally scheduled.

In fiscal year 2019, the District paid \$116,353 in capacity and treatment costs to the City and County of Los Angeles. In addition, the District paid \$84,139 toward the Tillman plant expansion. Future capital improvements for this facility are primarily funded through sewer connection fees ranging from \$2,975 to \$13,675 based on parcel identification in the Bell Canyon Sewer Assessment District No. 85-1 assessment area.

Bell Canyon homeowners not included in the assessment district began approaching District contract staff in September 1997 with requests to extend the Bell Canyon force main to serve their properties. Working together, the homeowners and Triunfo staff determined a grinder pump could be used to transport sewage solids to an extended main trunk line, and an agreement was reached relative to costs. Triunfo agreed to finance these costs over a five-year period, and the extension was in use by the end of May 1998. All of these original loans have been fully repaid. Triunfo extended itself to serve these property owners, creating a true public/private partnership. Further, the District Board developed a policy to cover future connections to the force main extension, and equalize costs for all participating homeowners over time. As a result, sewer service has been extended to over 100 additional lots in Bell Canyon, and more are expected as increasing numbers of Bell Canyon homeowners see the advantage of sewer service over aging septic systems.

Triunfo Recycled Water – The District provides recycled water treated at Tapia via the Joint Venture through two pipelines to the communities of Oak Park, Lake Sherwood and North Ranch. District recycled water sales were \$2,176,845 and \$2,575,319 in fiscal year 2019 and fiscal year 2018, respectively. The recycled water from Tapia travels through 5.4 miles of District retail recycled water lines to irrigate 7 parks, 6 schools, 1 golf course, 15 acres of landscaping and medians, and 16 homeowners associations. In hot summer months, local irrigation consumes all of the recycled water Tapia produces.

The Lake Sherwood Golf Course, a major recycled water customer, was built in 1989 expecting to use 100% recycled water for irrigation. Sherwood experienced difficulty maintaining turf quality and, in 1996, convinced the Ventura County Planning Department to approve the use of as much as 40% potable water for golf course irrigation. The District appealed based on a California law that requires recycled water be used for irrigation wherever available.

A study of Sherwood’s recycled water use was conducted, with the cost split equally by Lake Sherwood Ranch, the Calleguas Municipal Water District, and Triunfo. The study concluded the golf course requires deep drainage to remove salts from irrigation, regardless of whether recycled or potable water is used. Sherwood felt the deep drainage was both excessively disruptive and expensive, and proposed a field test, which was inconclusive. In June 2000, Triunfo proposed a compromise wherein Sherwood agreed to use 250 acre feet of recycled water per year, about 60% of its typical irrigation water requirement.

In 2017, Triunfo purchased the recycled water (RW) system from Calleguas Municipal Water District (Calleguas). The purchase of the RW system (at a cost of approximately \$12 million dollars) terminated the recycled water purchase agreement between Triunfo and Calleguas which allowed Triunfo to wholesale the RW to Hidden Valley and CalWater. The RW system includes 10 miles of pipeline (ranging from 4-18 inches), a 1.8 million gallon storage reservoir (Oak Park Reservoir), and a 5 million gallon per day pump station (Oak Park Pump Station). The RW system serves the communities of Oak Park, North Ranch, Lake Sherwood, and portions of Thousand Oaks.

The District also supported the Las Virgenes–Triunfo Joint Powers Authority in an extensive stakeholder-driven process to identify the best means to maximize the beneficial reuse of treated effluent from the Tapia Water Reclamation Facility. Following two years of study and community stakeholder input that focused on how to best manage discharge from the Tapia Water Reclamation Facility to Malibu Creek, the Pure Water Project Las Virgenes-Triunfo emerged as a preferred alternative to meet the goal, while also providing a local source of potable water. The Pure Water Project will take surplus recycled water from the Tapia Water Reclamation Facility and further treat it to better than drinking water standards. The treated water will be mixed with imported water stored in Las Virgenes Reservoir until needed. At that time, the water will be treated again prior to use in the potable water system.

Triunfo Potable Water – The District provides potable water service to the community of Oak Park which is mostly residential and is located at the eastern edge of Ventura County. The 2010 United States Census Bureau data indicates Oak Park has a population of approximately 13,811 with a median household income of \$121,348.

The District receives its potable water supply from the Metropolitan Water District of Southern California which is imported from the Sacramento Delta through Calleguas Municipal Water District, the regional water wholesale agency.

Residential customers make up approximately 94% (number of metered connections) of the District’s customer base and consumed approximately 89% of the potable water provided annually by the District. The remaining 11% was consumed by commercial customers. Potable water deliveries in fiscal year 2019

were 1,959 acre-feet compared to 2,167 acre-feet in fiscal year 2018. These deliveries provided income of \$5,790,358 and \$6,149,583 respectively.

The District's water tank sites have proven useful to cellular communication companies. Five leases were in place at the end of the fiscal year. Collectively, cellular service companies provided income of \$171,925 for fiscal year 2019 and \$175,394 for fiscal year 2018.

Economic Condition and Outlook

Local Economy

Ventura County – Located directly northwest of Los Angeles County, Ventura County covers 1,843 square miles and boasts 43 miles of Pacific Ocean coastline, 7.5 miles of shoreline in public beaches, and 411 acres in state beach parks. The majority of the County's 856,598 residents live in its southern half, while the Los Padres National Forest spans the northern half. An extensive network of roadways links the County's 10 incorporated cities, with rail, harbor, and airport facilities providing access to outside markets. The outlook for the Ventura County economy remains similar to 2018, and is predictably restrained. The total value of the region's output continues to rise, as there are companies within the County that still need to expand their workforces, and incomes rise more convincingly due to the tight labor market for workers. Agricultural and manufacturing output contribute to positive economic growth in 2019. Providing that companies can fill open positions for employment in Ventura County, growth in 2019 will likely exceed forecasts. Open job positions in California (and the nation) are a circumstance that companies now endure since the economy has reached full employment.

Agriculture - Ventura County farmers grow over 100 different crops and often harvest two or three crops from the same parcel of land during any given year. In 2018, the estimated gross value for all agriculture in Ventura County was \$2.1 billion decreasing by 0.2% from 2017. Strawberries, lemons, raspberries, nursery stock, and celery are among the five leading crops grown. In 2017, the most recent data available from the California Department of Food and Agriculture, ranks Ventura County 8th among all counties in the California in total crop value.

In December 2017, Ventura County's agricultural industry sustained more than \$170 million in damages from the Thomas Fire. According to Henry Gonzales, the County's agricultural commissioner, the Thomas Fire caused \$171,296,703 in damages to local agriculture and potentially affected 10,289 acres of irrigated crop land. Avocado groves were hit the hardest, with 6,603 acres potentially damaged, followed by lemon growers with 1,767 acres and orange growers at 541 acres. Approximately 4,030 tons of avocados were lost, at an estimated dollar loss of \$10,175,750, followed by lemons, with 7,591 tons lost and an estimated total loss of \$5,814,560 and oranges, with 3,680 tons lost and an estimated total loss of \$3,370,972. These losses will, partially be offset by disaster funds and insurance, but replacement trees require up to 5 years to begin bearing fully, so the impact will be felt in succeeding years as well.

Income and Unemployment – Ventura County's unemployment rate currently sits at 3.6%, the lowest rate recorded since 1990. The unemployment rate in Ventura County has declined continuously from a rate of 9.9 percent in 2012. The types of new job opportunities, however, tend to be in the lower paying sectors, such as healthcare and leisure and hospitality. Leisure and hospitality has the lowest average salary per worker of all sectors of the Ventura County economy. Nevertheless, the construction industry has higher average wages and with more housing and non-residential building, there has been an impressive rise in construction employment over the last few years. The Census ACS 1-year survey reports that the median household income for the Ventura County California area was \$82,857 in 2017, the latest figures available. Ventura County median household income is 13% higher than the median California household income and 27% greater than the US median household income. Median family and per capita income for Ventura County in 2017 was \$36,907, 15% higher than the national average and 5% higher than the California average.

Real Estate –The new housing market within Ventura County will add more units, both single family and apartments. Thomas fire rebuilds will continue, principally in Ventura, for the next two years. Homebuilding will accelerate to 135,000 units this year and nearly 140,000 units next year, the highest level of new housing permits since 2008. The median home sale price is \$697,754 in 2019, a 4.2% increase over the prior year. The median sales price for 2020 is predicted to increase by 6.3% to \$697,754. Non-residential construction has decreased from 2018 when the Conejo Spectrum in Thousand Oaks was completed (508,000sq.ft), but more than 200,000 square feet of space are still under construction, which includes a new helicopter repair facility in Fillmore and a large spec building in Simi Valley.

Long-term Financial Planning

The Pure Water Project will create a new, local, sustainable and drought-proof drinking water supply through the purification of the Las Virgenes – Triunfo Joint Powers Authority (JPA) surplus recycled water. The recycled water will undergo advance treatment, after which it will be stored at the Las Virgenes Reservoir for later use as drinking water. The project would reduce the need to discharge excess recycled water to Malibu Creek and is intended to diversify the region’s water supply and reduce dependence on imported water by generating up to 6 million gallons per day of drinking water. The current estimated cost for the project is \$100 million. The District’s policy is to increase the potable water and recycled water rates based on the increased rates from Calleguas Municipal Water District. The latest pass through rate increase will be effective January 1, 2020.

Relevant Financial Policies

The Board appointed one of the Board members to perform a monthly review of all invoices paid on their behalf by Ventura Regional Sanitation District. In addition, the Board also appointed two of the elected Board members to be on the Finance Committee to perform review and oversight in regards to financial matters such as the annual audit, proposed budget, and any other financial issues that require review, analysis, and recommendation before going to the full Board.

The District’s investment policy’s primary objectives are safety of principal while maintaining liquidity to meet all operating requirements, and attaining a market rate of return on its portfolio. The District’s investment policy is in accordance with provisions of the California Government Code. Currently, the District’s investment funds are placed in either the Ventura County Pooled investment account or the Local Agency Investment Fund (LAIF) account managed by the State Treasurer.

Staff continues to review the Five-Year Capital Improvement Plan (CIP) and makes recommendation to the District Board of any changes during the budget process. The CIP includes evaluation of the current water and wastewater systems, prioritization for acquisition, maintenance, replacement and retirement of capital assets, and recommendation on improving the operation and reliability of the existing systems.

Major Initiatives

The District developed a water conservation ordinance and water shortage contingency plan in response to the statewide water supply conditions. The District’s source for potable water is through the Metropolitan Water District. Metropolitan Water District has instituted potable water allocation requirements for all its customers in response to the water supply shortages being experienced throughout California.

On July 1, 2019, Triunfo Sanitation District changed its name to Triunfo Water & Sanitation District to better reflect the full scope of the District’s services.

Significant Event – Wet Winter

For the first time since 2011, California’s drought condition improved significantly due to a very wet winter across the state. As a result of this rainfall, and following the Governor’s decision to rescind his May 2016 executive order regarding California’s drought, the Board of Directors of Triunfo Sanitation District lifted the Stage 1 Water Restrictions for Oak Park water customers, effective July 1, 2017. Keeping in mind that dry conditions may easily recur, the District’s basic permanent water use restrictions remain in effect.

Significant Event – Woolsey Fire

The Woolsey Fire was a destructive wildfire that burned in Los Angeles and Ventura Counties, having been ignited on November 8, 2018, it burned 96,949 acres of land, destroyed 1,643 structures, killed three people, and prompted the evacuation of more than 295,000 people. At a special meeting on November 14, 2018, the Triunfo Sanitation District board of Directors authorized the District’s General Manager to provide financial relief to water and sewer service customers affected by the fire that burned in and around many sections of TSD’s service area. Water customers received a credit for the amount of water they used for 5 days, during and after the fire. In addition, TSD sewer customers who lost their homes in the fire were issued a refund for 8 months (November to June) of sewer service charges previously assessed on their property tax bills for fiscal year 2019.

Significant Event – Accessory Dwelling Units

In recent years the California legislature passed several laws related to accessory dwelling units (“ADUs”)—often referred to as “granny flats.” The laws are intended to facilitate ADU development in California, and overcome some of the local hurdles property owners experience in ADU construction. As the laws changed, residents of the District showed interest in building ADU’s. In FY2019 the District issued only 4 ADU related Will Serve Letters to customers. This may be more significant in future years.

Awards & Acknowledgements

Excellence in Financial Reporting – The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to Triunfo Sanitation District for its Comprehensive Annual Financial Report (CAFR) for the Fiscal Year ended June 30, 2018. In order to be awarded a Certificate of Achievement, a government must publish an easily readable and efficiently organized CAFR. This report must satisfy both generally accepted accounting principles and applicable legal requirements. A Certificate of Achievement is valid for a period of one year only. We believe this current report continues to meet the Certificate of Achievement program requirements and we are submitting it to the GFOA to determine its eligibility for another certificate.

Acknowledgements – The preparation of this report was possible because of the dedicated services of the contract Finance & Administration Department staff, each of whom has our sincere appreciation. We also express our appreciation to our independent auditors, Moss, Levy, Hartzheim, LLP, for their contribution and assistance in preparing this report. Finally, we thank the District Board of Directors for their interest and support in planning and conducting the financial operations of the District in a responsive and effective manner.
