

Accessing the Water Service Customer Portal

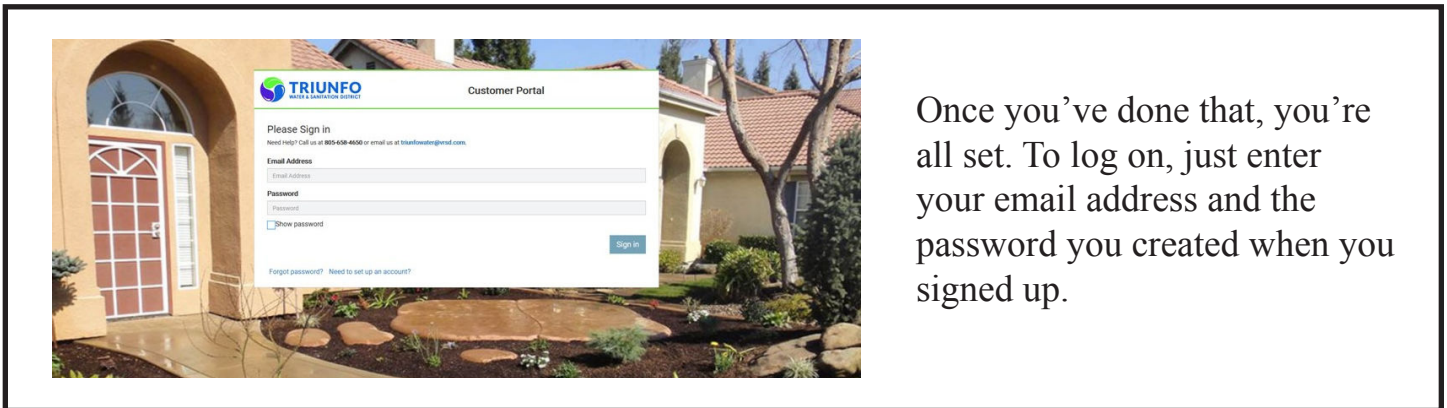

The Water Service Customer Portal enables you to track your water usage and set email or text alerts to notify you of high consumption. Set-up is quick and easy:

When you first visit the site, you'll see this screen.

On the next screen, you'll need to enter some basic information about you and your account.

Once you've done that, you're all set. To log on, just enter your email address and the password you created when you signed up.
