No monthly service charge shall be charged for laundry room facilities within a multiple residential complex, open to use only by residents of the complex.

Method For Fee Computation
<p>Method A - Based on water meter size</p> <p>Each ¾ inch meter shall equal (1) ERU. Each 1 inch meter shall equal two (2) ERU. Each 1-¼ inch or 1-½ inch meter shall equal four (4) ERU Each 2 inch meter shall equal (7) ERU Each 3 inch meter shall equal (15) ERU Each 4 inch meter shall equal (30) ERU Each 6 inch meter shall equal (60) ERU</p>
<p>Method B - Based on number of plumbing fixtures</p> <p>Each twenty-five (25) plumbing fixture units as defined in the Uniform Plumbing Code shall be considered equal to one (1) ERU.</p>
<p>Method C – Based on flow and waste characteristics</p> <p>Where flow and waste characteristics are of an unusual nature, the sewer connection and service fee shall be determined on the basis of strength of the five (5) day Biochemical Oxygen Demand (BOD), suspended solids, quantity of flow, and other factors of the waste discharge that affect the sewer collection, treatment and disposal systems. Determination of the strength of waste shall be conducted in accordance with the latest edition of “Standard Methods for the Examination of Water and Wastewater,” as published by the American Public Health Association, except where wastes of unusual character make other procedures necessary.</p>
<p>Method D – Based on estimated fixture units</p> <p>A developer may want to construct a shell of a building before determining the final fixture unit count. A developer may obtain a Will Serve letter based upon the District’s estimate of the buildings fixture units or estimated flow. Once the building has been completed and all fixture units installed, the District shall then recalculate the sewer connection and service fee. If the fixture unit count is greater than the original estimate, additional connection fees will be assessed accordingly. If the original estimate for sewer connection fees is greater than the actual As-Built fixture unit count, a refund of excess connection fees will be made to the developer.</p>
<p>Method E – Based on estimated flow</p> <p>Any commercial or industrial building which creates fifteen percent (15) or greater sewage discharge than the original sewer connection fee paid for may be subject to an increased sewer connection fee. For example, an office building may have paid connection fees for 10 ERUs when a Will Serve letter was first issued. At a rate of 250 gallons per day allowed per ERU, the building may be subject to an increased sewer connection fee if its wastewater discharge as determined either by direct metering of the discharge or if the water consumption records indicate that the building is discharging in excess of 10 ERU x 250 gpd x 365 days/year x 1.15 or 1.049 million gallons per year.</p>
