

UPDATE

Calleguas – Las Virgenes Interconnection Construction Activities

April 24, 2023

Need for the Project

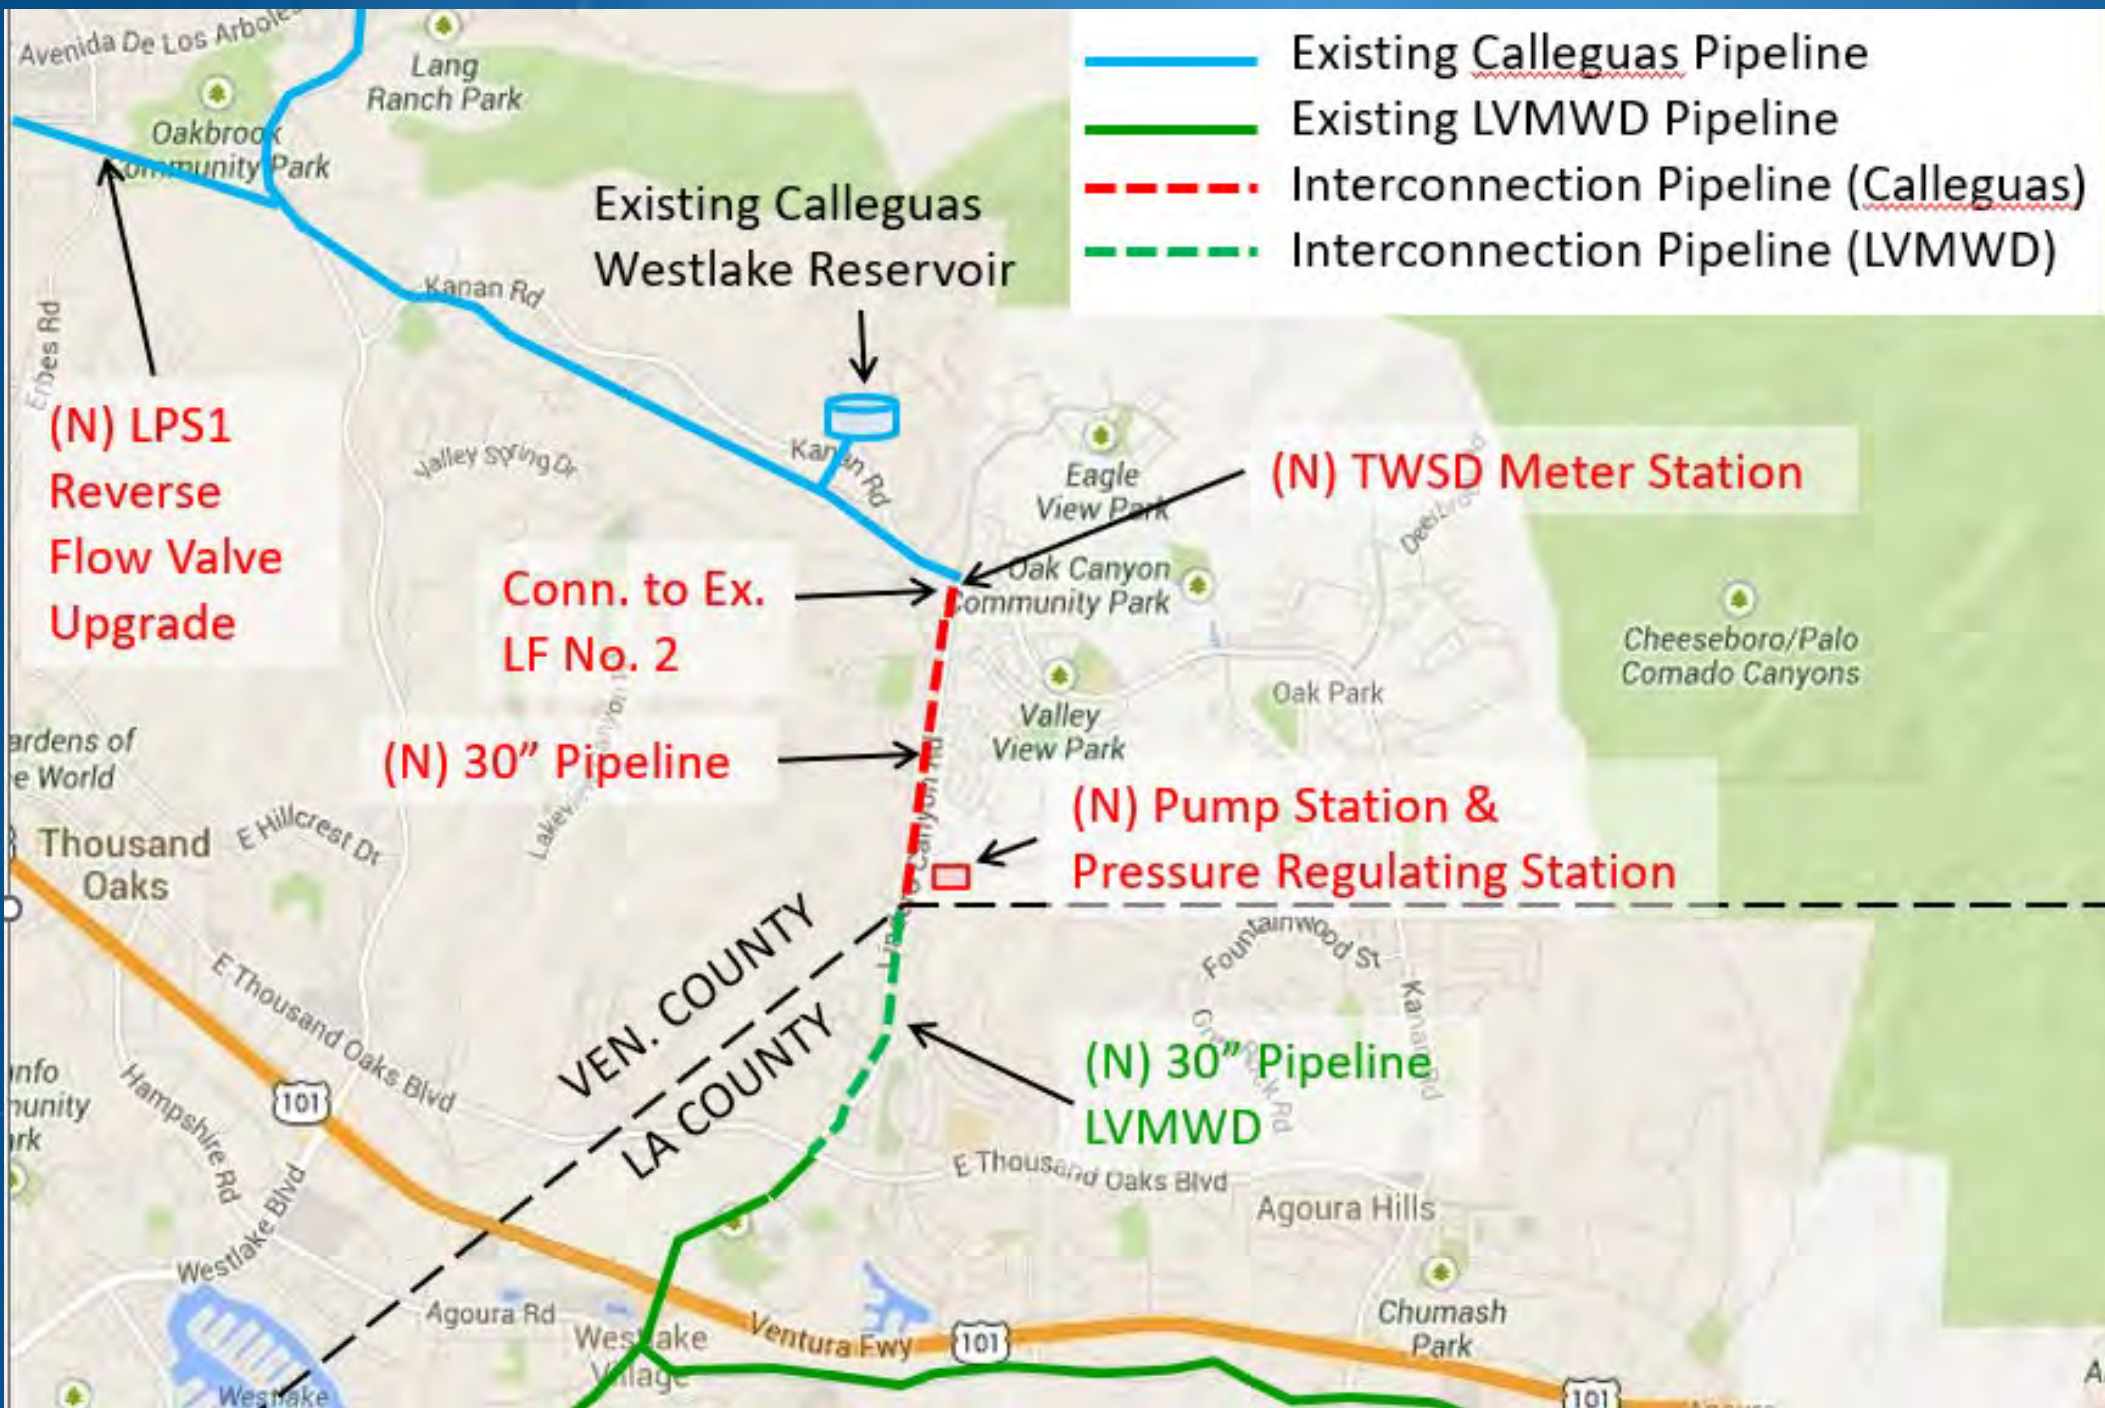

- Cost-effective means to improve reliability and flexibility of Calleguas' and LVMWD's potable water systems, by delivering water to each other's system.
- Each agency would meet its customers' demand first then help the other agency if they are able.

CALEGUAS - LAS VIRGENES
INTERCONNECTION

- Existing Calleguas Pipeline
- Existing LVMWD Pipeline
- - - Interconnection Pipeline (Calleguas)
- - - Interconnection Pipeline (LVMWD)

Construction Activity Update

Week of: January 16, 2023

Current Activity

Starting Friday night, January 20th at 7pm and continuing through Monday morning, January 23rd at 6am, Calleguas' contractor, Kiewit, will commence limited pavement removal and trench excavation operations at the intersection of Lindero Canyon Rd and Kanan Rd. To perform this work safely, a partial closure of the intersection is needed during this period which will impact some turning movements. Traffic control and detour signage will be in place along Lindero Canyon Rd, Kanan Rd, and surrounding local streets. The contractor anticipates working up to 24 hours per day during the partial closure of the intersection. [See construction flyer](#) for additional closure schedule information and detour maps.

Calleguas' contractor will also perform daywork within Lindero Canyon Rd, both north and south of the Rockfield St intersection. Work activity will include trench excavation, pipeline installation, and trench backfill. Traffic control will remain in place on Lindero Canyon Rd. Please follow posted traffic signs and plan for extra travel time to your destination. Work will also continue at the Pump Station/Pressure Reducing Station (PS/PRS) site located at 10 Lindero Canyon Rd.

Please note construction is dependent on many variables and this information is subject to change.

Upcoming Activity

Overnight and weekend work will begin in the Lindero Canyon Rd and Kanan Rd intersection starting January 20th and is expected to continue through the end of February. Work at the intersection will generally occur on weeknights, Monday-Friday, 7pm - 6am and on weekends, Friday 7pm - Monday 6am.

Project Background

Calleguas Municipal Water District (Calleguas) and Las Virgenes Municipal Water District (LVMWD) each own and operate potable water systems largely dependent on imported water supply. Both agencies are subject to planned and unplanned interruptions of water deliveries that can negatively impact their ability to deliver potable water to their respective customers. Calleguas and LVMWD are constructing an interconnection to improve the future reliability of both systems.
